

Course Description

This course is a review of orthopedic nursing designed to assist the participant to be successful in obtaining the ONC® certification. The course offers lectures, graphics, videos and practice questions in many of the areas that are tested on the examination. The content is designed to provide the tools and knowledge necessary to ensure successful preparation for the ONC® Exam. The exam is made up of different types of questions related to different key orthopedic components. These questions can prove challenging and potential test-takers must be prepared to face these challenges. This course gives the participant key information regarding the format of the exam, key components of the exam, strategies for preparing to take the exam, as well as strategies to successfully navigate the questions that are likely to be encountered.

ONC® is a registered trademark of the Orthopaedic Nurses Certification Board, which neither sponsors nor endorses this product.

Program Learning Outcomes

This program prepares the learner to:

- Describe the ONC® Exam, test plan and the practice requirements to sit for the exam.
- Construct a study plan for the exam based on understanding the blueprint and domains of practice covered.
- Identify common mistakes and pitfalls that are made during studying and testing for the exam.
- Recall the core components covered in the exam through didactic supplementation and test questions.
