We Make In-House Calls!

PROGRAM DESCRIPTION

This two-day seminar is designed to help both novice and expert critical care nurses incorporate a variety of monitoring data, such as hemodynamics and tissue oxygenation, into their patient assessments. The course employs an easy-to-use methodology for determining if the data obtained is accurate and practical ways to troubleshoot inaccuracies. It also discusses relevant nursing and medical treatment strategies for each patient population.

HOME STUDY

Our Distance Learning Department offers a wide selection of continuing education products for CE credit.

SPEAKERS

Lisa M. Soltis APRN, MSN, PCCN, CCRN-CSC, CCNS

Lisa brings over 13 years of critical care experience to her lectures. She has earned her BA from Western Michigan University, her BSN from the University of North Carolina-Charlotte, and her Master's Degree from Duke University School of Nursing as an Adult Critical Care Clinical Nurse Specialist. She is a member of Sigma Theta Tau, the American Association of Critical Care Nurses, the National Association of Clinical Nurse Specialists and the Society of Critical Care Medicine where she is also an instructor for the Fundamentals of Critical Care Support course. Her experience includes Trauma/Surgical Critical Care and over 9 years of Cardio-Thoracic Critical Care. She served for 2 1/2 years as the Manager/Clinical Educator for the Cardio-Thoracic/Transplant Critical Care unit at Duke University and currently works as the Cardiovascular Critical Care Clinical Nurse Specialist for WakeMed Health and Hospitals in Raleigh, NC. Lisa became passionate about teaching during her experience at Duke, and loves to help other nurses achieve their professional goals.

Kelly Thompson-Brazill MSN, ACNP, RN, CCRN-CSC, PCCN

Kelly brings 11 years of critical care experience to each lecture. She received her BSN from the University of Scranton (PA). She earned a MSN in Acute and Critical Care from Duke University, Durham, NC, in 2002. As a nurse practitioner, Kelly spent six years (including two years as the lead NP) with Trauma and Surgical Critical Care at University Health Systems of Eastern Carolina. Kelly is currently a Nurse Practitioner for Cardiothoracic Surgery at Wake Med Health & Hospitals, Raleigh, NC. Kelly has spoken both regionally and nationally on a variety of trauma and critical care topics and has published several articles. Kelly has received an Evidenced-Based Practice Research Grant from AACN, and served two-terms on both AACN's Advanced-Practice Work Group, as well as on the Research & Creative Abstracts Review Panel, and Continuing Education Review Panel. She is an active member of the Society of Critical Care Medicine (SCCM), where she serves on the ICU Design Committee and is a Paragon Quality Improvement Coach. She is an instructor for SCCM's Fundamentals of Critical Care Support and a reviewer for the Journal of Emergency Nursing. Nurses who attend Kelly's lectures say she has a remarkable command of critical care knowledge and can make complex theories easily understandable and clinically relevant.

Med-Ed reserves the right to substitute an equally qualified speaker. One of the above speakers will present at each location.

CURRENTS 2010:

 **27th Annual Critical Care and Emergency Conference** 
Hilton Head Island, SC ~ Hilton Head Marriott Resort and Spa
August 5-8, 2010

Monitoring in the ICU

Interpret the Numbers Troubleshoot the Problems

Registration begins at 7:30 am

AGENDA

DAY ONE

8:00 am - 12:00 pm

Hemodynamic Monitoring

- Patient Selection Criteria
- Basic Monitoring Techniques
- Advanced Monitoring Techniques
- RV Volume PA Catheters
- Non-invasive Cardiac Output Monitoring

Tissue Oxygenation Monitoring

- Why it's Important
- SVO2 vs SCVO2
- Gastric Tonometry
- Esophageal Cardiac Doppler Monitoring

Lunch on your own

1:00 pm - 4:00 pm

Anticoagulation Monitoring

- Monitoring Heparin and Direct Thrombin Inhibitor Drips
- Oral Antiplatelet Agents
- Heparin-Induced Thrombocytopenia and HIT
- Reversal of Anticoagulants

Transfusion Monitoring

- Indications for PRBC, FFP, Platelets
- Managing Transfusion Reactions
 - Hemolytic
 - Hypersensitivity
 - Bacterial
 - Febrile

DAY TWO

8:00 am - 12:00 pm

Cardiac Monitoring

- Choosing the Best Leads
- Introduction to the 12 Lead
- Monitoring for Acute Coronary Syndromes

Monitoring the Patient Undergoing

Therapeutic Hypothermia After

Cardiac Arrest

- Rationale for THAC
- Surface vs Intravascular Temperature Modulation
- Paralytic Monitoring
- Vitals and Electrolytes During Induction
- Maintenance and Rewarming
- Preventing Shivering

Lunch on your own

1:00 pm - 4:00 pm

Neuro Monitoring

- Standard ICP
- Ventriculostomy Catheters
- Licox Brain Tissue Oxygenation Monitoring

Sedation Monitoring

- Best Practices
- Which Scale is Best?
- BIS Monitoring: The How and Why

Putting it All Together with Case Studies
