

Advanced Stethoscope Assessment Skills

Course Description

This intensive one-day workshop provides the individual healthcare provider with the information needed to recognize and understand the production of sounds within the human body. Rather than memorizing sounds, the physiology of normal and abnormal sounds is presented with the use of audiovisual aids. Practice sessions enable the provider to accurately distinguish normal and abnormal sounds and recognize the significance of the sounds heard. The goals of this class are identifying strategies of treatment needs based on assessment findings and developing the confidence to use the stethoscope to assist in performing a thorough and accurate assessment. Please wear comfortable, loose clothes and bring your stethoscope!

Key Learning Outcome

- After completing the program, 80% of participants will report an increase in knowledge that will positively impact their practice.

Program Objectives

This program prepares the learner to:

- Describe the differences in stethoscopes and how to properly use your tool.
- Demonstrate a complete abdominal assessment.
- Identify organs and broken bones using the stethoscope.
- Identify the requirements for an adequate cardiac auscultation.
- Learn how to use the Handy Heart Simulator to duplicate heart sounds.

Agenda

Sign-in begins at 7:30 am. The day includes a one-hour lunch (on your own), as well as a morning and afternoon break of 15 minutes each. The order of lectures presented and break times may vary according to speaker preference.

8:00 am to 4:30 pm

Stethoscope Skills

Proper Usage of a Stethoscope | Properly Identify the Sounds You Hear | Sound = Movement

Auscultated Assisted Percussion

When It is Just You and Your Scope | What You Weren't Taught in School | You Can't Memorize Sounds

Auscultate Before You Palpate!

Big or Small Body | What the Research Says | Bowel Obstructions

'I Can't Hear You'

Lung Location | Atelectasis | Aspiration | Asthma | Pulmonary Edema | Pulmonary Hypertension

My Heart Only Beats for You

Blood Flow and What it Means | Valve Locations | Good Heart, Bad Heart

Don't Murmur, Speak Up!

Detection and Grading Murmurs | Bedside Teaching | Don't be Afraid of a Broken Heart
