

Dementia Across the Spectrum

Course Description

This course is designed to update healthcare practitioners who care for patients with cognitive impairments. Areas that will be covered include pathophysiology, pharmacologic strategies, behavior and cognitive therapies and end-of-life care.

Key Learning Outcome

- After completing the program, 80% of participants will report an increase in knowledge that will positively impact their practice.

Program Objectives

This program prepares the learner to:

- Recognize individuals with different types of cognitive impairments.
- Identify pharmacologic interventions, including benefits and risks, of common medications used in the cognitively impaired individual.
- Formulate a behavior management plan for a cognitively impaired person.
- Identify the common pathways to death and management strategies for cognitively impaired individuals with advanced disease.

Agenda

Sign-in begins at 7:30 am. The day includes a one-hour lunch (on your own), as well as a morning and afternoon break of 15 minutes each. The order of lectures presented and break times may vary according to speaker preference.

8:00 am to 4:00 pm

Introduction
