Managing Acute Illness of the Aging Population

Course Description
The hospitalized geriatric patient is at great risk for multiple complications that can result in increased morbidity and mortality. This two-day program is designed to provide the nurse and other healthcare providers with the up-to-date information necessary to provide excellent care for the acutely ill geriatric patient.

Program Learning Outcomes
This program prepares the learner to:
- Gain confidence in the management of the acutely ill geriatric patient.
- Increase awareness of early signs of complications that can occur in this high-risk patient.
- Improve recognition of key differences related to normal aging changes between younger and older patients.
- Develop a better understanding of current management strategies for the acutely ill and hospitalized geriatric patient.

Agenda
Sign-in begins at 7:30 am. Each day includes a one-hour lunch (on your own), as well as a morning and afternoon break of 15 minutes each. The order of lectures presented and break times may vary according to speaker preference.

Day 1, 8:00 am to 4:00 pm

0800 Intro to Geriatrics
What is It? | Who is It? | Where is It?

0830 The Hazards of Hospitalization
Immobility | Iatrogenesis | Functional Decline | Medication Errors

0915 The Physiologic Changes of Aging
Cardiovascular | Pulmonary | Renal

1000 Break
