

Nurse Executive Exam Cram (Basic)

Course Description

The Nurse Executive Exam Cram (Basic) is designed to provide an overview of those subjects that are included in the ANCC certification exam. Subjects covered include: professional practice, with focus on nursing theory, research, quality improvement, process improvement, change theory and ethics. Healthcare economics is reviewed, as well as the healthcare environment. Lastly, delivery of care including: regulatory, process outcome, Magnet recognition, benchmarking, charts and graphs are described. The course is a fast-paced, intense presentation, and review of the exam blueprint along with preliminary study is recommended prior to attending. After attending, participants are encouraged to create a study plan individualized to meet their needs to successfully pass this exam.

Key Learning Outcome

- After completing the program, 80% of participants will report an increase in knowledge and confidence necessary to pass the certification exam.

Program Objectives

This program prepares the learner to:

- Describe the Nurse Executive Exam (Basic), test plans and the practice requirements to sit for the exam.
- Develop a study plan for the exam based on understanding the blueprint and domains of practice covered.
- Identify common mistakes and pitfalls that are made during studying and testing for the exam.
- Review the core components covered in the exam through didactic supplementation and test questions.
