Orthopedic Nursing: Basics for Effective Patient Care

Course Description
The purpose of this program is to enable the learner/nurse/orthopedic patient care provider to gain an introduction to the specialty of orthopedic nursing, which includes the study of the care of patients experiencing orthopedic trauma, fractures, total joint arthroplasty, spinal surgery or orthopedic complications. Participants will be able to identify the essential components of a thorough orthopedic-focused assessment for early recognition of complications, describe the breadth of orthopedic injuries and conditions, determine safe patient positioning and mobilization and define essential components for effective orthopedic patient education to achieve positive patient outcomes. The full-day course content is based on national orthopedic nursing practice standards and patient teaching implications.

Program Learning Outcomes
This program prepares the learner to:

• Through a comprehensive review of basic orthopedic patient-centered care, have the foundation for provision of safe and effective patient care and state confidence in the promotion of positive orthopedic patient outcomes.

Agenda
Sign-in begins at 7:30 am. The day includes a one-hour lunch (on your own), as well as a morning and afternoon break of 15 minutes each. The order of lectures presented and break times may vary according to speaker preference.

8:00 am to 5:00 pm

0800 Welcome, Review and Overview of Subspecialties

0810 Basic Principles of Musculoskeletal System and Nursing Focus in Orthopedic History
Structures | Growth, Metabolism | Aging | Culture, Dietary Considerations | Basic Nursing Principles

1000 Break

1015 Orthopedic Priorities of Care
Tendonitis, Carpel Tunnel Syndrome | Hallux Valgus, Digit Contractures | Cerebral Palsy, Multiple Sclerosis | Osteosarcoma, Multiple Myeloma | Joints and Mobility | Degenerative Joint Diseases | Metabolic Bone Diseases | Pediatric Conditions

1115 Orthopedic Trauma and Fractures
Strains, Strains, Subluxation, Dislocation | Causes and Classification of Fractures | Bone Healing | Priorities and Key Assessments | Fracture Management | Cast Care | Traction | Transfers/Mobility | Equipment

1230 Lunch

1330 Orthopedic Trauma and Fractures (cont.)

1415 Benefits of Total Joint Arthroplasty
Priorities | Hip | Knee | Other Procedures | Venous Thromboembolism Threat | New Technologies

1450 Amputation
Causes | Level | Patient Care
