Course Description
This two-day program is designed to educate nurses and other healthcare professionals from a variety of settings including critical care, medical-surgical, emergency department, long-term care and hospice care about palliative care. Palliative care encompasses chronic and terminal disease management, pain and symptom management, excellent communication strategies, goals setting and end-of-life therapies. Because the nurse’s role in each of these areas is crucial, this seminar will help prepare the nurse to provide effective palliative care.

Program Learning Outcomes
This program prepares the learner to:

• Prepare the participant to engage in primary palliative care strategies in a variety of settings.
• Describe the differences between hospice care and palliative care.
• Formulate an approach to having a goal of care conversation.
• Recognize natural opportunities for death based on specific disease trajectories.
• Develop a plan of care for the patient who is actively dying.

Agenda
Sign-in begins at 7:30 am. Each day includes a one-hour lunch (on your own), as well as a morning and afternoon break of 15 minutes each. The order of lectures presented and break times may vary according to speaker preference.

Day 1, 8:00 am to 3:45 pm
Palliative Care: What Is It?
Historical Perspectives: How did We get Here? | Definitions: End-of-Life, Comfort Care, Hospice Care — Is There a Difference? | Goals of Care: Whose Goals are They Anyway? | Dying the Good Death: Can Death be Good?

The Disease Trajectory
CHF | COPD | Dementias | HIV, AIDS | Cancers

Symptom Management: Across All Settings — ICU to Home
Dyspnea and Cough | Anxiety and Agitation | Nausea and Vomiting | Fatigue and Depression

Lunch 11:45 am to 12:45 pm

Grief, Loss and Bereavement
The Grief Process: Types of Grief | Grief Assessment: Who is Grieving? | Bereavement Interventions: What Can We Do?
